PROJECTS

Barrel Network – Minecraft Server Community Portal | <https://barrel-network.vercel.app> | GitHub

A modern community hub website for the Barrel Minecraft Server Network, providing players with server information, staff directory, and support resources.

- Designed and developed a clean, Minecraft-themed static website serving as a central information portal for the gaming community
- Implemented a multi-section interface with server information hub, staff team directory, and gallery showcase , Built with HTML5, CSS3, and JavaScript to ensure lightweight performance and fast loading times , Deployed on GitHub Pages for reliable, serverless hosting with zero infrastructure overhead.
- Created responsive design that works seamlessly across desktop and mobile device , Features include contact support IDs, community resources, and important server links
- Tech Stack: HTML5, CSS3, JavaScript, GitHub Pages, TypeScript
